EDUCATION

Delhi Technological University

New Delhi, India

B.Tech. in Computer Science & Engineering

Expected Graduation, May 2027

- **CGPA: 9.01** (upto 5th Sem)
- **Relevant Coursework:** Data Structures & Algorithms, Object Oriented Programming(OOP), Machine Learning, Deep Learning, Database Management Systems (DBMS), Operating System, System Design Principles

EXPERIENCE

National Informatics Centre (NIC)

New Delhi, India

Software Engineering Intern

Dec 2025 – Jan 2026

- Selected among top 20 candidates nationwide under the Digital India Internship Program.
- Built an AI-enabled Consent Intelligence system aligned with the DPDP Act, 2023 to identify purpose-specific and minimal personal data attributes.
- Designed and implemented a RAG-based pipeline combining semantic search and LLM reasoning for regulatory decision-making.
- Developed backend to generate explainable and audit-ready outputs, improving reliability of AI-driven insights.
- Implemented semantic retrieval over regulatory datasets, ensuring high accuracy and consistency in responses.
- Focused on data minimization and compliance-driven system design in an e-governance environment.

ACHIEVEMENTS AND AWARDS

- **Specialist** at Codeforces (Max Rating : 1429)
- **Knight** at Leetcode (Max Rating : 1903)
- Solved **1000+** algorithmic problems across LeetCode, Codeforces, and AtCoder
- Achieved 99.1 Percentile in JEE MAINS 2023 (AIR : 10451)
- Qualified the internal round of Smart India Hackathon (SIH) held at DTU.

PROJECTS

CineSuggest | GitHub | Link

Python, Streamlit, TMDB API

Built CineSuggest, a movie recommendation system using content-based filtering and cosine similarity to deliver personalized suggestions. Developed an efficient feature extraction and vectorization pipeline for fast similarity-based retrieval. Optimized performance by reducing redundant computations and improving response time. Designed a clean UI with real-time search and integrated external APIs for enriched movie metadata.

HabitHub | GitHub

HTML, CSS, JavaScript, Chrome Extensions API, Firebase

Built HabitHub, a Chrome extension for tracking website usage and improving productivity through goal setting and time monitoring. Leveraged Chrome Extension APIs for real-time activity tracking and efficient data handling. Designed a responsive UI using JavaScript, HTML, and CSS for seamless user experience. Implemented structured data storage to manage user activity efficiently.

SKILLS

- **Languages:** C++, Python, JavaScript
- **Frontend:** React.js, Tailwind CSS, Typescript
- **Backend:** Node.js, Express.js, REST APIs, Scalable Service Design
- **Databases:** MySQL, SQL, Data Modeling, Query Optimization
- **Tools:** Git, GitHub, Chrome Extension APIs, API Design

CERTIFICATIONS

- Machine Learning Specialization By DeepLearning.AI - **Coursera**
- Full Stack Web Development Bootcamp By Angela Yu - **Udemy**
